Creed Of Life

1) God is all of creation. The consciousness of God is in every thing.
There is absolutely nothing in existence that is separate from the oneness of creation, which is God his self.

2) Fear, judgement, and negativity serves only the experience of duality of free will choice. Faith and trust are living the principals of love coming out of any fears, judgements, and negativity.

3) Love is the basis and driving force of life itself. God is love, the Word, and all life. Creation is the conscience and makeup of God his self.

4) Separation from the Oneness of creation is the manifestation of the flesh, not at all from your true spiritual self.

5) You are your own judge. The negativity you chose in the "now" will determine your karma for tomorrow. Since God foreknew you, your predestined life is set accordingly. Leaving your self within your own free will choices, positive and negative loves.

6) Your "neighbor" has just as much freedom as yourself to choose their own paths, belief systems, positives and negatives.
God is the only one that knows the soul and works within the confines of each individuals experiences that are shown from the souls understandings. Not yours.

7) The amount of respect of freedom you give, is the amount of freedom of respect you won't receive. What is unconditional?

Think like God, act like Jesus.
